

Impressive Mirror, Chrome, or Metallic Effects

Formerly, creating mirror or chrome effects was only possible by using expensive processes like the silvering of glass. With Mara[®] Chrome MC you can simply print these effects now.

Mara[®] Chrome MC is predestined for the making of high-quality indoor sales, advertising, and exhibition displays. Furthermore, it shows outstanding suitability for the decoration of float glass, or casings for electronic equipment (e. g. mobile phones).

Applications

Transparent materials such as:

- PMMA, polycarbonate, PETG, PETA
- Glass
- Films made of polycarbonate and coated polyester

Attention: The mirror effect can only be achieved by printing onto the reverse side of a transparent substrate!

Characteristics	Mara [®] Chrome MC
Solvent-based ink system	✓
Press-ready formulation	✓
Good mesh opening	✓
Mild odour	✓

For further details, please refer to the Technical Data Sheet or the TechINFO "Marabu Screen and Pad Printing Effects" on www.marabu-inks.com

Your Benefits:

Mirror effects can simply be screen printed!

→ Less effort than silvering

With screen printing it is possible to selectively apply Mirror Silver details

→ With the silvering process you can apply this effect only full-area

Many variations possible

→ By pre-printing with Marabu transparent shades (e. g. Mara[®] Star SR), a multitude of hues can be achieved

Very user friendly

- Press-ready formulation
- Good mesh opening
- Mild odour
